Proposition Submitted to Lincoln Memorial Commission.

Washington, July 27.—That the two-million-dollar Lincoln memorial should be placed in Arlington Cemetery, where are buried many of the heroesprivates and officers—of the war in which the martyred President was the dominant figure, is the latest suggestion which the Lincoln Memorial Commission has under consideration.

Authorship of the suggestion is credited to ex-Speaker Cannon, who is a member of the memorial commission. He was making some objections to the Potomac Park site, which has been recommended by the Fire Commission, and provide the Majestic was steaming along in a smooth sea last Saturday afternoon Drum jumped overboard. The cry of "Man overboard" brought the passengers to the rail, while sail-ors threw life buoys to Drum and low-ered a boat Drum was enolying his swim when he was picked up by the ship's boat. The steamer's log showed that Drum had an eleven-minute swim.

Washington, July 27.—Congress will be shortly asked by the War Department Asks Appropriation of Additional \$250,000 more to complete the work of raising the battleship Maine in Havana harbor. This will make a total expenditure of \$900,000. The board of engineers in charge of the work estimates it can be finished at the figure mentioned. That is \$100,000 under the estimate submitted to the latest session of Congress, when it was thought the total cost would reach \$1,000,000.

# Milk of Amazing Richness Thick as Thick Cream

Milk from high-bred cows, kept in model dairies. A germless milk-8 per cent butter fat-sold on a 6-cent basis.

The finest milk produced in America is sold in cans under the name Van Camp.

It'comes from Holstein cows. fed and bred in famous dairying sections. It is produced under rigid inspection.

In seven years we have spent over \$100,000 to learn how to bring it to you in perfect condition. We have employed for the purpose famous Dutch and Swiss experts. The result is a milk like the milks of Switzerland-right at your very door.

# **Absolutely Sterile**

Close to each dairy-in seven states-we have built a model evaporating plant. All are built

The milk fresh from the cows is there put in a vacuum. Two-thirds of the water is slowly evaporated. And, because of the vacuum, this is done without a scalding heat.

The evaporated milk is sealed up in tin cans. Then each can is sterilized. Not a germ of any

as you know, there are millions of germs. In Van Camp's there

## Like Using Cream

Van Camp's as it comes to you is as thick as thick cream. So thick that you add one part water for coffee, cereals or ice cream. It is 28 per cent solids, 8 per cent butter fat.

This milk gives to milk dishes amazing richness and flavor. Yet it is nothing but milk. We add not an atom of anything.

The difference is this: Milkman's milk separates. The butter fat rises and the solids fall. When that milk gets to your cooking it is rarely more than

Van Camp's is the whole milk. It has all the butter fat, all the solids, which belong to the richest milk. That is why milk dishes made with it seem so exceedingly rich.

## Six Cents Per Quart

When you reduce Van Camp's to the usual milk's richness the cost will figure about six cents per

We save shipping bulk by removing most of the water. We save you the cost of the milkman's daily delivery. That costs more than the milk. Then Van Camp's saves all waste. You open

a can when you want it, and it keeps till you use it up. You have never too much or too little,

In the average home, the use of Van Camp's cuts milk bills right in two.

### A Cow in the Pantry

You can buy, if you wish, a month's supply at a time. Then you have milk or cream for any purpose, all the time and all you want.

The milk has the maximum richness. It is utterly sterile. It is always fresh. When you put back the water it is exactly the same as it came from the cow, save for sterilization.

When you prove these facts by one day's use of Van Camp's you will never go without it.

## Be Sure of Van Camp's

We have brought this milk to such a high standard that no other American milk can compare with it. So many people have found this out that we now milk 30,000 cows daily to supply the demand for Van Camp's.

Yet Van Camp's costs no more than common evaporated milks. The 16-oz. can-a full pint of Van Camp's - costs 10 cents. The 6-oz. can costs 5 cents.

Remarkable Scene in Denver Court When Henwood Is Convicted.

Henwood, convicted of murder in the second degree for killing George E. Copeland, while shooting at S. L. von Phul, the St. Louis aeronaut, whom he also killed, in a hotel barroom here on the night of May 24, was to-day sentenced to life imprisonment.

An appeal will be taken. Never in the history of the local tribunals have the presiding judge and prosecutor been subjected to such an excoriation as that pronounced by Henwood, when asked what he had to say "why sentence should not be pro-

division."

Henwood characterized his treatment by the court and prosecutor as "persecution." and declared that his attorney had been "bound and gagged by rulings of the court." and that his trial for the killing of George E. Copeliand had in reality been turned to a preliminary hearing of the divorce case of John W. Springer.

Henwood recalled that he had been denounced by the prosecutor as "a destroyer of Mr. Springer's home," but maintained that he was, and is to-day, "wohn W. Springer's best friend."

Henwood charged that the first day Mrs. Springer was on the stand, when it was seen that she possessed knowledge "advantageous to me," she was excused. Later, when she was recalled, "a package of letters written by her to L. Von Phul were placed on the prosecutor's table in plain view, and she was confronted with a threat that they would be read in open court if she testified to any facts in my behalf. Not only this, but her otherwise keen mind was dulled by drugs."

"I am now ready for your unjust sentence." he concluded.

Judge Whitford listened attentively to the defendant.
